1. DESCRIPTION OF THE TEMPORIS 500

- MENU button
- Display
- M1...M10 memory keys
- CANCEL button
- Navigator button
- Confirm menu button
- LED for ringer, new events
- Voice mail
- Call list menu button
- Phonebook button
- Hands-free button
- Ringer and hands-free volume control
- Flash button
- Mute button
- Redial button
- Pause button
- Loudspeaker
- Peg for wall mounting
- Memory label
1.1 DISPLAY

The TEMPORIS 500 has a three-line display:

- 1 line of icons and information about the functions
- 1 line 16 digits.
- 1 line of 16 alphanumerical characters.

![Display Diagram]
1.2 EQUIPMENT SUPPLIED

- 1 TEMPORIS 500 telephone set
- 1 coiled cable
- 1 RJ11/RJ11 telephone cable (depends on countries)
- 1 memory label
- 7 user guides (English, French, Spanish, German, Dutch, Portuguese and Italian)
- 1 plug adapter (depends on countries)

1.3 CHARACTERISTICS

- 50 names and numbers phonebook directory
- RJ9 headset connection
- Calls can be made by selecting the name from the directory
- 10 direct access memories
- Access to Caller Name and/or Calling Line Identification services*
- Caller’s name and number displayed*
- Lists the last 30 calls received*
- Voice mail access*
- Duration of call displayed
- 5 extended last number redial function
- 4 ringtones selection
- Adjustable ringer volume with silent option
- Mixed dialing: tone or pulse (33/66) or pulse (40/60)
- Pre-dialing / on-hook dialing
- Adjustable handset volume
- Hands-free mode with adjustable loudspeaker volume
- Mute key to disable the microphone or put the caller on hold
- Date and time settings
- Call barring

* If the service is available and a subscription has been taken out (on public service telephone line only).
2. INSTALLING YOUR TEMPORIS 500

2.1 CONNECTING THE HANDSET

Connect one end of the coiled cable (A) to the handset and the other end (B) to the plug on the left-hand side of the base.
2.2 CONNECTING THE BASE

- Connect one end of the telephone cable to the socket on the back left-hand side of the base (C).

![Diagram of base with labeled sockets C and D]

NOTE: The other socket (D) is for connecting a modem.

2.3 WALL MOUNTING

To wall mount the telephone set, remove, reverse and reinsert the mounting peg as shown in the figure below.

Drill two horizontal holes of 6mm diameter with 86mm apart. Insert two wall plugs and screws (3.5mm diameter and 25mm long) leaving the screw head protruded. Place the cord in the slot under the base and hang the telephone onto the screws.

![Diagram of wall mounted position and horizontal position]
2.4 INSERTING OR REPLACING THE BATTERIES

Your phone uses 4 LRO3-AAA 1.5V alkaline batteries (not included).

Insert or replace the batteries as described below:

- For safety reasons, always unplug the telephone line first.
- Open the battery compartment on the bottom of the base. Push down hard on the door while sliding it back.
- Remove the used batteries and insert the new ones. Pay attention to the ‘+’ and ‘-’ polarity indicated in the battery compartment.
- Close the battery compartment and re-connect the telephone set.
- Batteries will last for approximately 6 months under normal conditions of use.
- When the batteries are drained, the battery icon will start flashing. You must then replace them with a fresh batteries as soon as possible.

**NOTE:** Your TEMPORIS 500 still work properly without batteries or with empty batteries. However if you disconnect it from the telephone line, it will lose information like the date and time and directory records except the content of the one-touch memories.

2.5 DECLARATION OF CONFORMITY

- The TEMPORIS 500 is certified in accordance with European regulations, as indicated by the CE marking.
- The TEMPORIS 500 is intended to transmit and receive telephone calls and for connection behind a private branch exchange (PBX) or a public network of the European community.
- It is designed for connection to a TRT3 class (telecommunications network voltage) analogue telephone line, as defined in the EN60950-1 standard.
- Thomson Telecom hereby declares that the TEMPORIS 500 conforms to the essential requirements and other relevant provisions of directive 1999/5/CE.
3. GENERAL USE

3.1 MESSAGE WAITING / RINGING INDICATOR LIGHT

When you receive a call, the light flashes with the same rhythm as the ringtone. If you have subscribed to the "Caller Identification" service, the light also indicates that there are new calls or messages in the list of calls. If you are connected to a private ALCATEL telephone system with a messaging service, this light indicates that there is a message in your voice mailbox.

3.2 CALL IN PROGRESS LIGHT

When you pick up your handset or seize the line in hands-free mode, the light associated with the button will come on and stay on as long as the line is busy.

3.3 PRE-DIALING / ON-HOOK DIALING

Insert or replace the batteries as described below:

- MAKING A CALL
  1. Dial your correspondent's number.
  2. Press the button to delete any incorrect numbers.
  3. Press the or button.
     The loudspeaker light is on.
  4. Adjust the volume using the and button.
  5. Press the button to end the call.
     or
  6. Lift the handset to continue with the conversation in private.

NOTE: The call duration counter starts about 16 seconds after the last digit has been dialled.
• OTHER WAYS OF MAKING A CALL

You can also make a call in other ways:
• Dialing the number and then lift up the handset.
• Press the button and then dial the number.
• Lift up the handset and then dial the number.

3.4 DIALLING USING A MEMORY

Each memory can hold 20 digits and 16 characters.

• CALLING FROM THE DIRECTORY

1 Press the button.

2 There are two ways of searching for a number:
• Use the and buttons to scroll through the names in the directory until the one you want is displayed.

3 Use the and buttons to shift the phone number if more then 16 digits.

4 Press the button to make the call.

or

4 Use the to enter your correspondent's number.

or

4 lift the handset to make the call.

NOTE: The call duration counter starts 16 seconds after the last digit has been dialled.

• CALLING FROM A DIRECT MEMORY

1 Just press the selected direct access memory button. The loudspeaker light lites on.

2 Pick up the handset when your correspondent answers.

or

2 Start the conversation in hands-free mode.

NOTE: The call duration counter starts 16 seconds after the last digit has been dialled.
3.5 RECEIVING A CALL

There are two ways to answer the call:

- Lift the handset.
- Press the button, then start the conversation in hands-free mode.

NOTE: If the ringer is disabled, the incoming call will signal on both the display and LED (flashing). Answer the call as described above.
- The call duration counter starts as soon as you answer the call.

3.6 USING HANDS-FREE MODE

If you are in conversation using the handset and wish to change to the loudspeaker instead:

1. Press the button and replace the handset.
   - The others around you can participate in the conversation.

2. Adjust the volume using the and buttons.

3. Lift the handset to return to a private conversation.

3.7 ADJUSTING THE HANDSET VOLUME

When the loudspeaker is disabled, you can increase the handset volume.

1. Press the button in order to increase the volume.

2. Press the button in order to decrease the volume.

3.8 USING THE MUTE FUNCTION

This feature allows you disable your conversation from being heard by your correspondent during a conversation.

1. Press the button.
   - Your correspondent can no longer hear you. The mute icon will be displayed.

2. Press the button again to resume the conversation.
3.9 PUTTING A CALL ON HOLD / TRANSFERRING A CALL

You can put your correspondent on hold whilst you transfer your call to another parallel telephone in another room.

1. Press the button.
   - Your correspondent can no longer hear you.
     The mute icon will be displayed.

2. Replace the handset.
   - Both you and your correspondent hear a beep in approximately 10 seconds interval. Mute icon will start flashing.

3. Pick up the handset to resume the conversation.
   or
   - Pick up the handset of the second telephone set to resume the conversation on that phone.
   - The TEMPORIS 500 releases the line.

3.10 REDIALING THE LAST NUMBERS CALLED

The redial memory's capacity is 32 digits.
There are two ways to redial the last number called:

- IN OFF-HOOK MODE

1. Press the button.
   - The telephone automatically dial the last number called.
IN ON-HOOK MODE - EXTENDED REDIALING OF LAST NUMBER

The TEMPORIS 500 records the last 5 numbers called.

1. Press the button. 
   - The last number called is displayed.

2. Use the or buttons to display the last 5 numbers called.

3. Press the button or lift the handset or press the hands-free key .
   - The telephone will dial the number automatically.

DELETING A NUMBER

If you do not want the last numbers you called to be reviewed, you can delete them individually.

1. Press the button. 
   - The last number called is displayed.

2. Use the or buttons to select the number to delete .

3. Press the button.

4. Use or buttons to select "ERASE?" (to delete the selected number)
   or
   "ERASE ALL?" (to delete all the number)

5. Press the button confirm erase.
4. PROGRAMMING YOUR TEMPORIS 500

Your TEMPORIS 500 has a configuration menu. To access the different sub-menus, when the telephone is in stand-by mode, follow the instructions given below.

You can return to stand-by mode from any point in the menu or sub-menu by pressing the [MENU] button again. Any procedure that has been started but not terminated will be aborted.

If you make an error, e.g. entered wrong data, you will be prompted with 3 beeps tone.

1. Press the [MENU] button.

2. Press the [ ] button.

Each new press on the [ ] button gives access to the next sub-menu.

- [CONTRAST] Set contrast.
- [LANGUAGE] Set language.
- [RING TONE] Set ring tone.
- [DATE/TIME] Set date and time.
- [CALL SETTING] Set call setting.
- [LOCK?] Or unlock?
- [CHANGE PIN CODE?] Change the PIN.

NOTE: When a function is validated the screen displays "SAVED" and the telephone returns to the previous state after 1.5 seconds.
4.1 CONTRAST

1. Press the \textbf{MENU} button.

2. Press the \textbf{OK} button.

3. Press the \textbullet\textbullet\textbullet\textbullet\ and \textbullet\textbullet\textbullet\textbullet\ button to adjust the contrast.

4. Press the \textbf{OK} button to confirm.

4.2 LANGUAGE

The \textbf{TEMPORIS 500} offer 7 languages display:

- English, French, Spanish, German, Dutch, Portuguese, Italian.

1. Press the \textbf{MENU} button.

2. Press the \textbullet\textbullet\textbullet\textbullet\ button.

3. Press the \textbf{OK} button.

To access some features of the TEMPORIS 500 you need to use a PIN. The default PIN is 0000. You can change it to your own code.

1. Press the \textit{contrast} button.
2. Press the \textit{OK} button until the screen displays "CHANGE PIN CODE?".
3. Press the \textit{OK} button.
4. Enter the old PIN.
5. Press the \textit{OK} button.
6. Enter the new PIN.
7. Press the \textit{OK} button. Confirming the new pin by entering it again.
8. Press the \textit{OK} button to save.
4.9 PROGRAMMING THE MAILBOX NUMBER

If you have programmed a mailbox number, it will dial automatically when you press the mailbox key.

1. Press the **MENU** button.
   - CONTRAST

2. Press the **●** button until the screen displays "CALL SETTING".
   - CALL SETTING

3. Press the **OK** button.
   - AREA CODE

4. Press the **●** button to select voice mail.
   - VOICEMAIL

5. Press the **OK** button.
   - VOICEMAIL

6. Enter the phone number.
   - 345678
     - VOICEMAIL

7. Press the **OK** button to save.
   - SAVED
5. USING THE "CALLER IDENTIFICATION" SERVICES*

Your operator offers some services that are only available if you subscribe to them. The TEMPORIS 500 can work with the Caller Identification (CLI) service in on-hook mode or in conversation mode with a call waiting. The CLI service informs you of the calling party’s number or name before you answer the call.

This service is only available by subscription on public service telephone lines and on some PBXs. To subscribe: please contact your operator.

5.1 LIST OF CALLS*

The list of calls is linked to the CLI service offered by your operator.

It can record 30 different numbers of people whom have contacted you. When there is insufficient memory space, the oldest record will be replaced by the latest one.

The display gives you the following information about the CLI service:

When a new calling line identity is received, the related information is recorded in the list of calls and the indicator light starts flashing.

* On subscription from your network operator, subject to availability.
5.2 TO CONSULT THE CALL LOG

The message light flashes.

New calls in the list of calls.

New message your mailbox.

Press the button.

You have been called by:
- JOHN
- From line 13585686845
  - Last call was on October 9th at 8.05 PM.

Press the button.

You see the second new call.

12 NEW CALLS

13585686845
JOHN

123456789
JACK
5.3 SAVING A RECORD FROM THE LIST OF CALLS

When a call record is displayed:

1. Press the \textbf{MENU} button.
   - \textbf{STORE?} button.

2. Press the \textbf{OK} button.
   - Enter the name, if not already proposed, and press \textbf{OK} to confirm.
   - Modify the number if necessary and press \textbf{OK} to save record.
   - \textbf{SAVED} button.

5.4 DELETING A RECORD FROM THE LIST OF CALLS

When a call record is displayed:

1. Press the \textbf{MENU} button.
   - \textbf{STORE?} button.

2. Press the \textbf{OK} or \textbf{I} buttons and select erase?
   - \textbf{ERASE?} button.

3. Press the \textbf{OK} button to confirm.
   - \textbf{ERASED} button.

5.5 CALLING A CORRESPONDENT FROM THE LIST OF CALLS

When a call record is displayed:

1. Press the \textbf{OK} or \textbf{CALL} button, or pick up the handset.

\begin{verbatim}
12 9  09/10 08:05.
13585686845
JOHN
\end{verbatim}

Set up the call by either by picking up the handset or changing to hands-free mode.
6. CONNECTING AND USING A HEADSET*

6.1 CONNECTING A HEADSET

Plug the headset cable into the socket on the base of the telephone.

6.2 USING A HEADSET

To use the headset, once you have plugged it in:

1. Pick up the handset.

2. Slide the switch on the base towards the headset icon.

3. Dial the number.
   - You can now use the telephone in the normal way.

If you want to continue with your conversation using the handset instead, slide the switch back towards the handset icon.

* Not included with the TEMPORIS 500.
Your headset must have an RJ9 connector.
Please use headsets that are compliant with EN60950-1 and designed to be used with telephones.

7.3 GUARANTEE

Your TEMPORIS 500 telephone is approved in conformity with European regulations, as attested by the CE mark.

You are covered by a legal guarantee on this product. For all information concerning this guarantee, please contact your reseller.

Regardless of the legal warranty covering the product, the reseller guarantees conformity of the products with their technical specifications for a period of twelve (12) months, parts and labour, starting from the date appearing on the proof of purchase of the product. You should therefore retain your invoice or till receipt specifying the date of purchase of the product and the name of the reseller. However, if the legal warranty applicable in your country exceeds twelve (12) months, then the legal warranty alone applies. The non-conforming part or product will be repaired or replaced free of charge, by an identical part or product, or one at least equivalent in terms of functionality and performance. If it proves impossible to repair or replace the item, the product will be reimbursed.

The spare product or part, which may be either new or reconditioned, is guaranteed either for three months from the date of repair or until the end of the initial warranty period, whichever is the longer. All parts or products returned and replaced become the property of the manufacturer.

However, this warranty does not apply in the following cases:

• installation or use in a way that fails to comply with the instructions contained in this guide;
• incorrect connection or non-standard use of the product, notably with accessories not designed for the purpose;
• normal wear and tear;
• failure to comply with the technical and safety standards prevailing in the state or country of use;
• devices subjected to shocks or falls;
• devices damaged by lightning, voltage surge, heat sources or radiation therefrom, water, exposure to excessive humidity, or any other cause external to the product itself;
• negligence or poor maintenance;
• maintenance, modification or repair of the product by persons not authorised by the manufacturer or reseller.

SUBJECT TO LEGAL PROVISIONS, ALL WARRANTIES OTHER THAN THOSE DESCRIBED HEREIN ARE EXPRESSLY EXCLUDED.
7.4 ENVIRONMENT

This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste. The European Union has implemented a specific collection and recycling system for which producer’s are responsible.
This appliance has been designed and manufactured with high quality materials and components that can be recycled and reused. Electrical and electronic appliances are liable to contain parts that are necessary in order for the system to work properly but which can become a health and environmental hazard if they are not handled or disposed of in the proper way.
Consequently, please do not throw out your inoperative appliance with the household waste.
If you are the owner of the appliance, you must deposit it at the appropriate local collection point or leave it with the vendor when buying a new appliance.
- If you are a professional user, please follow your supplier’s instructions.
- If the appliance is rented to you or left in your care, please contact your service provider

Please help us protect the environment in which we live!

7.5 SAFETY

- Your telephone must be kept away from sources of excessive heat (radiators, direct sunlight, etc...) and protected against vibrations and dust. Never allow your telephone to come into contact with water or other liquids or aerosols.
- Working temperature range: +5°C to +40°C.
- Your telephone must be installed at least 1 metre away from electrical equipment such as a TV, mobile phone, computers, minitels, halogen hot-plates, halogen lamps. If you use your telephone on a broadband line (ADSL modem), remember to use an ADSL filter.

To clean your telephone, use a lightly moistened antistatic cloth.

Warning: the same standard classifies the mains voltage as dangerous.
Only use batteries with specifications identical to those mentioned in this guide (see the section "Inserting or replacing the batteries"). The use of batteries that do not conform represents a health risk and may damage your telephone.

Do not attempt to open the batteries, as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes, mouth and nose. In the event of contact, rinse the affected part for twenty minutes in running water and seek medical assistance immediately.

In the event of danger, the mains adapter acts as 230V power isolating device. It should therefore, as a precaution, be installed close to the appliance and be easily accessible.

Clean the telephone with absorbent paper or a dry cloth and contact your reseller to change your batteries.

**Do not use your telephone to notify a gas leak when you are in the vicinity of the leak.**

We recommend that you avoid using this device during electrical storms.
